ASA Education Program: Updates and Inquiries

2019 North American CCA Board Meeting
September 17, 2019
Wichita, KS
Today’s Topics

• Education program overview
• Subscription model
• Webinars
• Podcasts, videos, and microlearning
• Exam study materials
• Competency-based education
• ASA Learning Management System (LMS)
• Local board grant proposals
• Surveys
• Sustainable Agronomy Conference
• Agriculture and learning trends

From 2019 to 2020, we expand our library, build productive partnerships, win grants, and provide a better user experience.

From 2021 to 2022, we develop an agronomy and soil science learning hub, benchmark, and learning environment that is on-demand, mobile-capable, and multi-modal-focused.

In 2023 and beyond, we are a learning hub, benchmark, and go-to partner for the larger agronomy, crop, soil, and allied science communities, interactive, and intuitive.
